EDUCATION

Santa Clara University

Bachelor of Science in Computer Science/Data Science, Computer Engineer and Math Minors

SANTA CLARA, CA

Sep 2021-June 2025

Relevant Courses: Artificial Intelligence, Data Science, Applied ML, Object-Oriented Programming, Algorithm, Data Structure

TECHNICAL SKILLS AND LANGUAGE

- **Programming Languages:** Java, Python, C/C++, C#, JavaScript, SQL, NoSQL, HTML/CSS, SWIFT, TypeScript
- **Technical:** Matplotlib, Pandas, Pytorch, Numpy, Scikit-learn, REST APIs, Spring Boots, React.js, Docker, Kubernetes
- **Focus:** Backend Development, Machine Learning, Data Science, Deep Learning, Data Mining, Functional Programming
- **Languages:** Native fluency in English and Chinese(Mandarin)

PROFESSIONAL EXPERIENCES

Paidwork | *AI/Machine Learning Internship* | Sacramento, CA | Remote

Sept 2025-Present

- Implemented a machine learning pipeline that reduced model training time by 20%, leveraging cloud-based distributed computing and automated hyperparameter tuning.
- Developed and fine-tuned translation modules for a multilingual chatbot using NLP techniques, improving response accuracy and reducing misinterpretations.
- Utilized Python, NLP libraries such as Hugging Face, NLTK, and spaCy, along with translation APIs to integrate multilingual support into an AI chatbot

Santa Clara University | *Technical Service Student Assistant* | Santa Clara, CA

May 2024-June 2025

- Utilized SQL to maintain and update SCU's library database of 50,000+ records, ensuring efficient organization and accessibility of information resources for users.
- Assisted library staff in the ongoing process of updating and integrating government documents into the library's collections, ensuring compliance with archival standards and reducing cataloging errors by 20%.
- Developed and optimized Excel command sequences to streamline data sorting, analysis, and reporting for a team of 20 employees.

DuPont | *Technical Engineer Intern* | Hsinchu, Taiwan

June 2023-Aug 2023

- Developed and implemented an AI camera bot that scans the safety gadgets of workers in the lab, significantly enhancing compliance monitoring and reducing manual inspection time by 70%.
- Led training and awareness initiatives within DuPont's Internship Program, attended by over 1,000 employees on key tools and technologies, earning 1st place in the Internship Program Competition.
- Provided technical support to a team of 20 employees by developing and optimizing Excel command sequences for data sorting, analysis, and reporting and streamlining team operations.

PROJECTS

Online Ordering System App | (Java, MySQL, SpringBoots, JavaScript, Docker)

July 2025-Sep 2025

- Developed AI-Assisted web matching system for people looking to purchase food.
- Implement secure user authentication using Spring Security and JWT, enabling token-based session management.
- Develop login and registration endpoints with encrypted password storage(Bycrypt) to ensure compliance with security.
- Engineer scalable RESTful APIs in Spring Boot to handle order and user workflow.
- Used MySQL as the primary database engine with JPA/Hibernate object relational mapping.

Ergonomic Risk Detection Research(Reinforcement Learning) | (Python, Jupiter)

April 2025-June 2025

- Led the design and execution of a model evaluation/multi-benchmarking reinforcement learning research project.
- Managed and analyzed the training process for multiple algorithms over 200,000 sensor conditions.
- Explored diverse reward structures fine-tuning reward dynamics to drive optimal agent behavior and coordination
- Developed evaluation framework to access algorithmic performance, determining ICU setup lacked discriminative power
- Collaborated with a cross functional team to integrate findings into a comprehensive research paper.

LLM Motivational Web App | (OpenAI, Python, HTML, JavaScript, CSS)

Sep 2024-Dec 2025

- Building AI assisted web applications to generate daily motivation texts, enabling personalized encouragement.
- Implement a responsive HTML/CSS interface with accessibility standards to ensure seamless cross-device usability.
- Integrate natural language processing technique to interpret free-form text inputs and convert them into structured queries.
- Integrate OpenAI API to process natural language inputs, enabling users to describe tailored motivational needs.

LEADERSHIP EXPERIENCE

Alpha Phi Omega | *Vice President & Historian*

Feb 2024-June 2024

- Coordinated the execution of membership recruitment and pledge programs, ensuring smooth onboarding and engagement.
- Overseeing the creation and execution of the pledge education program, ensuring effective integration of fraternity values.
- Managed a comprehensive member database, maintaining accurate records for over 100+ active and alumni members.
